**NOTE:** If construction joint is not used, the contractor is to provide a sawed joint (1/2" thick) at the base of the superstructure section.

**NOTE:** Underdrain under sleeper slab if open graded drainage course is used instead of aggregate base. Maintain underdrain at abutment.

**NOTE:** Use geotextile separator only with open graded drainage course.

**NOTE:** If underdrain under sleeper slab, aggregate base is to be compacted to 98%. Add special provision for aggregate base density, bridge approach to the project.

**NOTE:** See bridge design guide 6.20.03A for approach slab orientation, reinforcement, and desired slab lengths.
