a. **Description.** This special provision identifies the notification requirements when demolishing or renovating a building or structure.

b. **Notification.** Demolition of any building or structure requires notification of the Michigan Department of Natural Resources and Environment (MDNRE), regardless of the presence or absence of asbestos containing materials. Complete a separate Notification of Intent to Renovate/Demolish (form EQP 5661) for each building or structure. If regulated asbestos containing materials that exceed the threshold values identified on the notification form are present, or if abatement and/or demolition procedures cause an unregulated asbestos containing material to become regulated, the Michigan Department of Energy, Labor and Economic Growth (MDELEG) must also be notified. Building or structure renovation requires notification when regulated asbestos containing material exceeding threshold amounts identified on the notification form will be disturbed. Sign the form as owner/operator and submit to the address specified on the notification form a minimum of 10 working days (10 calendar days for MDELEG notification) prior to the start date of the demolition or renovation. The start date includes the date of removal of any regulated asbestos containing materials.

c. **Terminology.**

   **Regulated Asbestos-Containing Material.** Is defined in the National Emission Standards for Hazardous Air Pollutants (NESHAP) which is found in Title 40, Part 61, Subpart M of the Code of Federal Regulations (40 CFR Part 61).

d. **Measurement and Payment.** The above described notifications will not be paid for separately but will be considered to be included in other contract pay items.
